## About the Author

Cara St.Louis is an American activist and author who has been traveling the world speaking about The Aerosol War since 2010. The over-riding question for us all at this moment is why are we allowing ourselves to be medically experimented on, to be gassed from the sky, for our planet to be terraformed in such a way that it is uninhabitable for us, the Earth's true partners? The answer lies in a snapshot of the 20th century, which can be characterized as an all-out social engineering war against humanity with the goal of cultural obliteration, particularly in terms of western civilization. Yet, we can save ourselves if we simply remember who we are. It is our power that makes us the prime target. Harald Kautz-Vella is a chemist, activist and author living in Germany. In this collaboration, he has shared much of his scientific but very understandable analysis of chemtrails and how they affect cellular life on earth. He has researched Morgellon's Syndrome extensively and has been present at occurrences of an absolute cure for the same. Herein, he discusses this as well as the esoteric nature of the crimes against 20th century humanity which, as we shall see, can be easily traced back to John Dee. Harald also discusses the function and phenomenon of sentient oil, of which he has a deep knowledge, as well as its antidote. Humanity's most powerful weapon is that which has been under brutal siege: The Imagination. Several chapters have been published on Vortex Magazine as previews in the last few months and have been read widely. The excerpts have received stellar reviews. Let's move to the next level and take our planet back.

Dangerous Imagination, Silent Assimilation is a no-excuses conversation about the social engineering of the twentieth century, how it led to our planet being terraformed almost without our knowledge and what we can do about it. It's not as hard as you think. The side effects of global medical experimentation are devastating and fatal unless we act... Morgellon's Syndrome and the use of Sentient OIL, both of which are being understood deeply and handled. Read how.

**HARALD KAUTZ-VELLA: Transhumanism, AI, Chemtrails, Smart Dust, & Morgellons**

By S. Ferguson

**HARALD KAUTZ-VELLA: Transhumanism, AI, Chemtrails, Smart Dust, & Morgellons**

The second half of this book is by Harald Kautz-Vella, who "started to work on these topics while dealing with environmental protection analysis and came across a number of substances that shouldn't have been in

nature because they are 100% artificial, and they are high tech, and there is no other reason to have them in the environment apart from intent — and not the best one, let's put it this way." Harald Kautz-Vella is that rare being who can weave together both the spiritual-metaphysical and scientific. Returning to the substances he found in the environment, he says, "And if you root these substances back to what they are designed for, you come to Transhumanistic technologies, which is the attempt to get an interface between artificial intelligence and biological. If you ask the Transhumanists themselves, they would always say they would like to give humans better access to AI — and if you look into the technologies, it's always to the opposite way round, it's always giving the AI access to the human, in the sense of getting the human system controlled from the outside."

Off-Planet AI: The unknowns involved in artificial intelligence loom over humanity. Harald Kautz-Vella says, "Most of the people in the world are wrong when they think that AI is something that we [meaning humans on earth] have developed. True to some extent. But there is a second type of AI that is much older and not of terrestrial origin that we are facing. Hard to prove, but it's looks like the AI we are working on is seeded by these original extraterrestrial AI." This astonishing mind-blowing recent body of knowledge from Harald Kautz-Vella encompasses the Chemical Composition of Chemtrails, Demonic Foundations, Morgellon's Disease, and Sentient Oil. There are topics that are indeed frightening, however he also has an experiential understanding of higher metaphysics, the Cycles of Time, and an obvious connection with Creation. I'm still assimilating his information, but I feel it is more than provocative and in fact puts so many loose ends together that it is well worth your time, even if you don't agree with every point he makes.

Biophotons & Negentropy: "The Imagination Chronicles: One, Dangerous Imagination, Silent Assimilation" is the book written by Cara St. Louis and Harald Kautz-Vella. His scientific information is in the second half. For example the concept of biophoton emissions, light signals that contain information of value to biological systems — and biophotonic-activity to non-linear optics and quantum physics. He discusses negentropy, which is "the ability to spontaneously build up order and concentrate energy. Negentropy is naturally occurring in biology and in fluid dynamics — generally spoken of in non-linear systems that show some kind of self-reference and thus are able to self-organize and build up fractal order."

Morgellon's Disease: Morgellon's Disease is raining down on us from our skies. Research on Morgellons has been done by the courageous scientist Clif Carnicom — who says, "The Morgellons condition may have a much broader basis and distribution than we might like to admit or know." Elana Freeland explains his statement: "In other words, in Morgellons victims the filaments are in extremis, but the truth is that all populations subject to the chemtrails delivery system will probably experience at least a slow degradation of health as the immune system is undermined... the 'organism' may be in everyone's blood." Carnicom found that "the blood of his samples is undergoing a transformation: the cellular structure is changing to a more fibrous form, and spherical structures like those inside the fibers are appearing in disturbed blood cells." Elana Freeland: "All evidence has pointed to four major forms and one minor form of the genetically altered Morgellons pathogen being delivered by aerosols, genetically modified foods, water systems...vaccinations and other inoculations. Clifford E. Carnicom admits that humanity is facing an imminent health holocaust."

Smart Dust: self-assembling within the human body

Harald Kautz-Vella describes Morgellon's as fungi that are "able to assimilate higher DNA, multiply it and build up a DNA cluster that creates a morphogenic field...The fungus is using a multilayered hexagonal structure to protect and cover the spore. These hexagons...are part of synthetic biology research, called self-assembling large area photonic plasmonic crystals. ...within the human body are hollow fibers that accumulate nanodyes within the fiber and those hexagonal self-assembling large area photonic-plasmonic crystals...both are self-assembling nano-bots. They [the intelligence community] spray them in components, separated into bioform and nano-dye, call this mixture smart-dust, and expect the smart dust to bio-

accumulate and self-assemble itself into working units in the body."

I know this is not easy to grasp at first. I have to read it over and over. To continue..."The fibers and crystals form a read/write unit. The fibers collect DNA light communication, i.e. the bi-directional single photon emissions interchanged by any DNA cluster, and turn it into radio signals." I feel that Harald Kautz-Vella is describing the nightmare scenario of AI science implementing a 'mechanical' black-magic technology, meaning melding the darkside occult that exists in the astral planes into a technology that utilizes, assimilates and lives within our human body: AI as a high-tech parasite and the ultimate solidification of black magic into matter.

AI-Morgellon's vampires: Harald Kautz-Vella says that by extracting light from our DNA, Morgellon's lowers the scalar potential of the DNA. In my words, this off-planet AI is intended to rob us of our God-given ability to access higher consciousness in the realms that are now invisible to the five senses and prevent our return Home and Enlightenment. "They are flattening us down, lowering 'our vibration', extracting energy. Sucking out what one could call the life force. ...This could be one aspect of the aluminum-connection to Alzheimer and dementia. ...This is far beyond any known concept of mind control." But as he also says, this form of energy extraction is very much in line with the ancient traditions of the Archons, black magic, and mind parasites. Techno-cooties!

This is alien ET technology: There are many Harald Kautz-Vella online videos to learn from. In one he says, "I am hardcore scientist, but I really appreciate the possibilities that lie in the spiritual world and I had so many open questions to this [now deceased] whistle blower" [on 'optimized cluster topology' that lets RNA DNA sequences carry life-forms/ relates to smart dust] that he attended a lady who can talk to people who are dead. The man appeared immediately and talked through her saying, "This is alien technology - it is not human technology and we have been fooled. There is no deactivation code. It doesn't exist. It is just a big scam that they offered to us to let us think we could control the system, but this is alien technology and it is not controllable anymore through us." Harald Kautz-Vella wants the intelligence community to know they have been fooled. They believe they are controlling this, but they are not. Apparently the deceased man speaking was suffering because of the misuse of this technology and is very concerned, admitting that the ETs had lied to them.

If the story from Harald Kautz-Vella was only one of fear, I would not write about it — but along with the science, he also understands that we are now entering the final stages of this cycle of time, the Kali Yuga. Harald Kautz-Vella has recently encountered great Spiritual Beings working in the Invisible Realms, as he says within "the collective field structure" who have much higher capabilities and know exactly what they are doing. Harald Kautz-Vella does not wish to be focused on as some special leader. He says his information changes nothing. What the world needs is people changing the things on this planet, not a 'big guy' Harald. Rescue yourself!

"The information is out there, but ... information doesn't change a thing. What does change things is in Spirit. The only thing left for me [Harald] to do is take on the quality of change that is possible for me. Our egos are part of the Matrix system. Our egos are the thing that is keeping up the separation. It is keeping us from feeling the pain we cause. The core problem now is to disassemble our [small-identity] selves. Every single person on the planet will have to do this alone, it is nothing to be lectured about. It is something that needs to be done! Every single person needs to do this out of his own Will, out of his own power, from the Being side, not from the ego side. The first step is to get ourselves back into empathy and seeing what we have caused. Become what we were before... You have to rescue yourself!"

I've learned a great deal from Harald Kautz-Vella. Even if you don't agree with everything he says, he has

much to teach us and I'm sure I haven't begun to grok his beautiful non-linear wide mind.

Will Under LOVE! That shall be the whole of the LAW!

By Morgonzo

THANK YOU Cara, THANK YOU HARALD! A very important book for many reasons, but mostly to put some answers to questions that tend to only spur more questions. To go in depth about this book is pointless here because it goes DEEP!!! Do yourself a favor, but it AND Cara's other book The Sun Thief (translated for German by Harald..) and prepare to have your preconceived notions majorly challenged. One thing I would like to add, is that I am a Christian, believing in the divinity of Jesus Christ and although these books rest more in the realm of Alternate Spirituality (NOT New Age..this is NOT a NEW AGE Religion book) where one is conscious of a GOD, but un-willing to self Identify for fear of aligning with another arm of the Grand Deception, I find all the points being made to completely align with the true message of Christ, not the Church. They might be un-willing to draw the connection, but I felt it as an un-deniable sub-text through-out the book. As Harald says (paraphrased) If we all lived through the heart, instead of the mind/Intellect, we could create a consciousness flip to the majority in a POSITIVE orientation and abolish Hate, Greed etc through mass EMPATHY....Crowley said Love under Will, I say Will Under LOVE!!! THAT, is the whole of the LAW! LOVE first THINK Second.

Double Book - One-Two Punch

By Molly Hall

Though it's a book that deals with dire matters, I feel optimistic that there are brave souls getting the word (and truth) out. Cara St. Louis provides the reader with the roots of social conditioning, and why there is such surreal passivity, when so many known mortal threats are intensifying. I especially found her insights on the Folk Soul and the Divine Will compelling. The second half by Harald Kautz-Vella on the technologies being deployed of those with a "philosophy of control" is clear and (mostly) easy to understand for the layman. He's in a position to be a leading-edge voice for humanity and all life, with the science knowledge AND an awareness of the metaphysical. Kudos to Harald and Cara, champions on the front lines for human survival...
