If you're searching, Lou is here!

By Amazon Customer

Read this, read it all. I have studied astrology, read OOB literature by Robert Monroe, Seth Material by Jane Roberts, etc...etc...! All great, but truly only precursors to getting closer to who and what we are. If you are a searcher, and you must be if you "stumbled" on this material, buy ALL of Lou's books and be prepared for a wild ride around this universe. Enjoy all of the many revelations, the uncovering of many mysteries but also be prepared for his ultimate message, "we are not here to change the world, we are here for the world to change us". The responsibility of the weight of "personal" responsibility that permeates his "message", should be the most important piece you take away from this book and all of his others. You will get your share of UFO's, ancient history and current affairs but heed the true message of cultivating integrity, because this is why we're all really here.

Another OUTSTANDING Book! you can't resist reading

By Pablo's Tid bits

As usual, Lou Baldin has published ANOTHER of his OUTSTANDING books. When you look up at the sky at night and you see the bazillion stars twinkling at you, in a way, they are speaking to you. Big question is Are you listening? If you are ready to expand your "mental/spiritual" horizons from your current limited "beliefs", give your self permission to stretch your mental neurons . In the end, you may discover a greater awareness of what this life is all about in a way never previously considered. In the process, you may experience it from "front row seats"; the greatest theatrical performance available to 3D/4D humans...grounded to earth.

Information for the road we travel

By Amazon Customer

I have read everything that Lou has written over the years.

Every blog turned into books and every book written as non fiction.

This is more along the blog circuit in question and answer format.

Lou is not for everyone.

His answers are clear and resonate if you are being open and honest with your self, and with in the layers of information some where is E.T.

I say Lou is not for everyone, because not everyone wants to hear the stark reality of their personal truth and how it all ties in with those from outside and other dimensions.

People want to read Gene Roddenberry, but spare the Spock philosophy.

Lou is Spock with light touches of Gene Roddenberry.

I always pick up something new in ATS blogs that relates directly to me.

This time it was about how we/I operate outside our/my own parameters. I never had a clue that there were parameters, and reading someone like Lou tells you that you are seeking to live outside those set parameters.

I also read Lou leans to the right in his ideology which is really quite surprising because Lou's thoughts (IMHO) and realities read like a central leaning left progressive like myself; could it be our definition of right is all wrong?

Because the book is in Blog format you can pick it up on any page and put it down and return at anytime and the conversation is still in full swing.

A great read and lots to take on board for a fruitful and happy life.
