Review

"This book has two strengths. First, it covers historical and contemporary viewpoints, enabling the reader to understand the role that women contributed to change over space through time. Second, the work contains studies at various scales, ranging from the local to the global....the book is an excellent introduction to the geography of gender and is also recommended to nongeographers. An excellent feature is the liberal number of maps, photographs, and drawings. Lower-division undergraduates and above."--Choice

"For too long, Anglophone geography has lacked a comprehensive introductory text on gender issues. *Putting Women in Place* answers this need. The text's strength lies in its attention to the central debates and concerns of the many subfields of human geography, and its balanced approach to both historical and contemporary examples. It will serve as an important anchoring text for introductory gender and geography courses, as well as a companion text for geographically oriented introductory courses in women's studies."--Sallie Marston, Department of Geography and Regional Development, University of Arizona

"Most geographical studies assign women an invisible place in space. It is man who explores, names, and dominates while woman remains invisible. This book offers a broad account of the variety and complexity of gendered roles in both time and space, whether in the domestic environment, the workplace, the city, the imperial colony, or the natural environment. From single women as homesteaders on the American frontier, to lady Victorian explorers finding freedom and release through travel, to super-moms in the suburbs carrying out their multiple roles, Domosh and Seager offer a compelling account of how definitions of femininity are forged in space."--M. Christine Boyer, School of Architecture, Princeton University

"*Putting Women in Place: Feminist Geographers Make Sense of the World* is a lively and well-illustrated overview of the geography of women. Treating both historical and contemporary issues, Domosh and Seager provide a feminist perspective on space and gender. For many years, I have wanted to be able to assign a book like this. I recommend it for graduate and undergraduate courses in geography, history, architecture, and urban studies. --Dolores Hayden, Professor of Architecture, Urbanism, and American Studies, Yale University, author of *The Grand Domestic Revolution: A History of Feminist Designs for American Homes,*

PUTTING WOMEN IN PLACE: FEMINIST GEOGRAPHERS MAKE SENSE OF THE WORLD BY MONA DOMOSH, JONI SEAGER PDF

Why do women and men tend to work in different jobs, in different ways, and in different spaces? Which is more "masculine"--the city or the suburbs? Why is nature often represented in feminine form? This thought-provoking book uses the lens of gender to provide an illuminating new perspective on the geography of everyday life. Domosh and Seager show how notions of maleness and femaleness have influenced our built environment, the locations in which we invest meaning, and the ways we live, work, travel, and explore. From the arrangement of furniture in Victorian homes to the movements of refugees over contemporary borders, the book explores gender patterns and roles across cultures and historical periods. It is lavishly illustrated with line drawings, photographs, and maps.

Excellent book

By Hope

Was a little skeptical when I saw the book for my Gender Studies class was called Putting Women in Place, which doesn't sound like a very female-friendly title, but it turned out to be incredibly good. Domosh and Seager have a way of writing that is clear and easy to understand as they tackle relevant subjects of Women's Studies today.
