Best way to learn Python

By Storm

Just what I needed for my Business Application Programming class. Text is easy to understand and follow.

Bought for 60, class the book uses Python 3 my class uses Python 2 sold it for 5 bucks. Got a free netted myself -\$55 profit

By Good Morning America

Uses Python 3 - Do NOT buy this before talking to your prof - or if this is for fun - just download the free O'Reilly version. I bought for like 60 bucks, turns out Python 3 isn't big yet, and went to sell this back to the school and they offered my 5 bucks.

Also, if you know ANY programming - this is worthless. One of those overly verbose tomes that take like 20 pages to say something that can be said in a about 5. Better off using youtube. Totally worthless.

If you have never used a computer before you may get some value out of it, but there are much better intro texts on the market.

If you know any C++ or Java, or even javascript for that matter you will learn nothing from this text.
