Excellent Course Helper

By Fei Du

This is the best course readings in management accounting. Different from an old-fashioned text book, this book brings in real-world cases from Wall Street Journal, Harvard Business Review and the most cutting-edge research in top accounting journals. I really admire the author's efforts in trying to integrate research into teaching.

The content of this book is very rich, including cases on the activity base costing, the balanced scorecard, Just-in-time technique, and total quality management technique.

Feeling confused about those fancy jargons in management accounting? This is a good book to buy. This course readings helps me a lot in my MBA class.

Interesting cases with examples, poor publishing work and some errors.

By magda3103

Very interesting cases that make you stop and think about the subject matter. Some grammar and structure

mistakes are a bit disappointing.
